Send us your feedback! If you liked the HD-Audio Solo Ultra Cracked Version application, you will like this application too. It is simple to operate. After installing it, open it and you will see an interface with a simple looking tree view. There are tabs for DVD, Video and BD. Selecting one opens its respective panel. Inside the various panels, you will find tools like Play, stop, set, export, clean, format, and much more. As with the HD-Audio Solo application, you will need to decide on the audio features for the DVD, Video or Bluray media. The software will then search the PC hard disk for the tracks, and import them to the software. You will have the options to customize the tracks to play (as with HD-Audio Solo application, it supports AAC-LC/HE-AAC, AC3, Dolby Digital, and DTS). At the top, you will see a menu where you can name the disc, and you can go to the project settings. There are three tabs, output, settings and import. The output tab is where you can decide which disc to export, you can also check the embedded data, and specify the destination. It is a good idea to use only one disc to export, just keep this in mind. There is the play tab where you can select files and play them. The tracks can play in a List, or in a file selector. Here, you can click play to start playing a track, stop, pause, etc. There is also a play timer that allows you to set the progress of the track to a specific time. To stop playing, hit the stop button. The settings tab allows you to check your settings, go into the project list, and export the project. Select export on the menu, and you can choose to export to DVD, Blu-ray, CD or AC3. The import tab allows you to import the tracks to your project. The menu allows you to import from AAC-LC/HE-AAC, AC3, Dolby Digital and DTS, you can also import from DVD, Video and BD discs. If you want to know more about this software, read the Readme file included with it. If you liked the HD-Audio Solo Ultra application, you will like this application too. It is simple to operate.
